

CHAPTER 10.7.

FOWL TYPHOID AND PULLORUM DISEASE

Article 10.7.1.

General provisions

Standards for diagnostic tests are described in the *Terrestrial Manual*.

Article 10.7.2.

Recommendations for the importation of domestic birds

Veterinary Authorities of importing countries should require the presentation of an *international veterinary certificate* attesting that the birds:

- 1) showed no clinical sign of fowl typhoid and pullorum disease on the day of shipment;
- 2) come from *establishments* which are recognised as being free from fowl typhoid and pullorum disease; and/or
- 3) have been subjected to a diagnostic test for fowl typhoid and pullorum disease with negative results; and/or
- 4) were kept in a *quarantine station* for not less than 21 days prior to shipment.

Article 10.7.3.

Recommendations for the importation of day-old birds

Veterinary Authorities of importing countries should require the presentation of an *international veterinary certificate* attesting that the *day-old birds*:

- 1) come from *establishments* and/or hatcheries which are recognised as being free from fowl typhoid and pullorum disease and from hatcheries which comply with the standards referred to in Chapter 6.4.;
- 2) were shipped in clean and unused packages.

Article 10.7.4.

Recommendations for the importation of hatching eggs of domestic birds

Veterinary Authorities of importing countries should require the presentation of an *international veterinary certificate* attesting that the *hatching eggs*:

- 1) have been disinfected in conformity with the standards referred to in Chapter 6.4.;
- 2) come from *establishments* and/or hatcheries which are recognised as being free from fowl typhoid and pullorum disease and from hatcheries which comply with the standards referred to in Chapter 6.4.;
- 3) were shipped in clean and unused packages.
