

CHAPTER 11.2.

BOVINE BABESIOSIS

Article 11.2.1.

General provisions

Standards for diagnostic tests and vaccines are described in the *Terrestrial Manual*.

Article 11.2.2.

Recommendations for importation from countries considered infected with bovine babesiosis

For cattle

Veterinary Authorities of free countries should require the presentation of an *international veterinary certificate* attesting that the *animals*:

- 1) showed no clinical sign of bovine babesiosis on the day of shipment; and
- 2) were, since birth, resident in a *zone* known to be free of bovine babesiosis for the previous two years;

OR

- 3) showed no clinical sign of bovine babesiosis on the day of shipment; and
- 4) were subjected to a diagnostic test for bovine babesiosis with negative results during 30 days prior to shipment; and
- 5) were treated with an effective drug such as imidocarb as a single dose injection at 2 mg/kg or amicarbalide at 10 mg/kg (under study);

AND

in either of the above cases:

- 6) were treated with an acaricide prior to shipment and were completely free of ticks.
-
