ADDITIONAL CERTIFICATION

Product represented by this certificate meets specification requirements for:

Export Requirements for Shell Eggs - South Korea, 04/10/2017

Check each applicable box:

- ☒ Product represented on this certificate meets the requirements for the stated grade and size as determined by online sampling on MM/DD/YYYY.
- ☐ Disease Free Certification Statements attached.

REMARKS

Certified for Export - Fit for Human Consumption. The shell eggs covered by this certificate were produced in a USDA approved facility according to International HACCP principles. All chemicals utilized during the processing of the eggs comply with U.S. regulatory requirements for use in/on food products including the sanitizing of the eggs after washing. Eggs are analyzed by the U.S. Food and Drug Administration (FDA) for chemical contaminants, including drug residues, pesticide residues, radionuclides, heavy metals, dioxins and PCB's.

Date(s) of Lay: MM/DD/YYYY

Air Cargo: The following seals were applied to individual pallets: [001 - XXX]

Edible Egg species is chicken.

Name and State of production farm: _____

Product weight is (Insert shipment weight) _____

Projected shipping date: _____

Transport vessel number and shipping port (or flight): _____

(Impression of Export Stamp - in blue ink)

USDA is an equal opportunity provider, employer, and lender.

Disease Free Statements for Republic of Korea

Table Eggs for Export to Republic of Korea

Poultry Products Grading Certificate No. SEA: _____

Dated: _____

Name and address of production farm: _____

The Animal and Plant Health Inspection Service (APHIS), Veterinary Services (VS) certifies that:

1) **EITHER**

There have been no outbreaks of highly pathogenic avian influenza (HPAI) (as this disease is defined by the World Organization for Animal Health [OIE]) in the United States in the 12 months prior to export; however, in case the Korean Minister of Agriculture, Food and Rural Affairs (MAFRA) recognizes that an effective stamping out policy for HPAI is in place in the United States, the period can be shortened in accordance with the OIE Terrestrial Animal Health Code.

OR

When highly pathogenic avian influenza occurs in the United States,

- a. The hens from which the eggs are derived were raised only in States free from high pathogenicity avian influenza (HPAI).
 - b. The hens from which the eggs are derived were tested for HPAI in accordance with the National Poultry Improvement Plan (NPIP) with negative results.
- 2) There have been no outbreaks of Newcastle disease (as this disease is defined by the World Organization for Animal Health) within a 10-kilometer radius of the production farm, and processing/grading/packaging/storage establishments for at least 2 months prior to export.
- 3) There has been no confirmed diagnosis of Newcastle disease (as this disease is defined by the World Organization for Animal Health) in birds at the eggs' production farm based on surveillance that includes both clinical observations (passive surveillance) and laboratory testing conducted by the government of the United States or the government of the State in which the production farm is located within 60 days prior to export.
- 4) The hens from which the eggs are derived originated from farms participating in the National Poultry Improvement Plan, which is coordinated and administered by the government of the United States, and are free of *Salmonella pullorum*, *S. enteritidis*, and *S. gallinarum*.
